DRIVING YOUR BUSINESS

First Flight for Positive Pathways Students

Orlando, Florida- PowerfulEducation Technologies, LLC along with GroundFlights, Inc. and Air Orlando will be hosting an Aviation Shadow Day for the students of Positive Pathways that were involved in the “You’ve Got the Power!” program. This invitation only event will take place Saturday August 27th from 8:30am to 10:30am at Air Orlando.

“This flight experience will give the students an opportunity to experience something that many people do not have the chance to. We are pleased to be able to partner with Air Orlando and Ground Flights to provide such an awesome opportunity to the students to award them for their hard work last year.” said Vice President, Myah Clayton.

Students at Positive Pathways Transition Center participated in the “You’ve Got the Power!” program facilitated by PowerfulEducation Technologies. A component of this program was the Power Movers Competition that challenged the students to research a variety of different components involved in starting a business and prepare a presentation.

Upon completion of the program, GroundFlights Inc. Founder/COO, Thomas Duffy (Powerful Education Technologies Board Member and former airline pilot) offered to take the winning students on an introductory flight in order to expose the students to greater opportunities within their surrounding communities. Air Orlando has provided the winners of this competition the opportunity to experience a flight in a private plane by providing the aircraft and flight instructors that will be working with the winning students.

About PowerfulEducation Technologies:

PowerfulEducation Technologies, LLC specializes in the creation, publication and administration of educational materials, programs, training sessions, workshops, services, and tools; which enable teaching, learning, and innovation within educational systems to enhance Character Education, Personal Development and Social Skills. PowerfulEducation Technologies, LLC programs and materials were designed by combining fundamental cognitive learning principles with situational learning, experiential learning and stimulating activities to generate

enlightenment, exposure, excitement, and encouragement. Powerful *Education* Technologies, LLC has a proven track record of designing workbooks and other technology based tools and applications that can readily be used by teachers, role models, parents, and students to enhance character development and life-skills formation. Educational materials produced by our company have helped to modify behavior and decision making, while enhancing academic performance and the desire for lifelong success of persons involved in our programs. These programs have been used successfully with youth as well as adults.

About GroundFlights, Inc. (www.GroundFlights.com) :

GroundFlights idea is quite simple! As the leading provider of executive travel, they alleviate your stress and maximize your productivity while you are traveling on business. Their services are on-demand, door-to-door and provide business travelers the freedom and control to travel in a way never seen before. They provide the comfort, attentiveness, safety and exclusivity of a private jet at a fraction of the cost.

GroundFlights cares about their community in which they live and work and exercise that caring nature as often as possible. The company founders are involved with several non-profit organizations in capacities ranging from volunteer, board members, and sitting presidents.
